Your Voice

Kent Stanford University

It was an immensely rewarding and memorable experience! If you have any interest in Japan at all, then you should definitely do an internship there, and with ICC!

Working abroad in Japan will not only increase your appreciation for Japanese culture and society but will also immensely improve your language skills.

It really gave me motivation and inspiration to be like, "They did it, they are speaking fluently. If they can do it, I can do it too".

I feel like I found my friends and that I am motivated to work towards this in the future when I come back. Everyone is encouraging and really lovely. It was an awesome experience!
